# INTRODUCING

Tulsi Fibre Glass Industries is a Fiberglass & WPC Doors, WPC door frames & WPC Window manufacturer company since 1994. Our domain-specific expertise and extensive experience in the area allow us to deliver products and services that are affordable yet high quality. Today, Tulsi is a reputed, recognized, and respected name in the door manufacturing industry. We have a long list of loyal clients who are confident about the quality of our products and happy to do repeat business with us.

Our services are open to everyone, be it a large-scale organization like school, college, shopping center, hospital, a small family, and an individual.

In addition, we are also happy to customize our products as per your liking. Tulsi Fibre Glass Industries has been committed to bringing value and quality to our customers from the very beginning.

To do so, we empower our professional team with the tools, resources, and opportunities required to offer excellent, international-standard products and services. We put innovation and quality as the cornerstones that inspire our work.

Our professional team is a colorful blend of qualified engineers, experienced business managers, trained project managers, and creative design experts that put equal efforts and hard work into each piece that we manufacture. To make sure that we stay at the top of the game, we utilize modern, top-notch technological tools and equipment and state-of-the-art infrastructure at our manufacturing facilities.

The values of integrity, accountability, honesty, and determination motivate the work that we do at Tulsi. Our primary aim, from inception till now, remains absolute customer satisfaction. Our customers are our primary priority and we are not hesitant to walk an extra mile to ensure all of our clients' requirements are adequately met.

**Our Product Selection Is  
Comprehensive And You'll Be Able  
To Find A Broad Range Of Designs To  
Meet Your Aesthetic, Budget, And  
Quality Requirements.**

## OUR MISSION

To continue to offer affordable, reliable, and premium-quality products to our clients and expand our name and reputation beyond national markets.

---

## OUR VISION

To support and encourage sustainable development by offering eco-friendly products.

- ▶ Premium Doors (Entrance Door) ◀
  - ▶ Art Panel Doors ◀
  - ▶ WPC Safety Doors ◀
  - ▶ WPC Window ◀
  - ▶ WPC Door Frame ◀

# STANDARD DOORS (INTERIOR DOORS)

Internal doors are just as important to the overall appearance of the interior of your home as wallpaper or wall paint. It is, therefore, that you need to be careful when choosing the right internal doors. Tulsi provides customized internal fiberglass doors that match the style of your interior. Steel doors often get rusted if they are not taken care of properly and wooden doors usually get swollen and deteriorate. But there's no such issue with fiberglass doors. In addition to being long-lasting, fiberglass doors are incredibly easy to clean and maintain. If your door collects dust, cobwebs, or dirt, you can easily wipe it off with a cloth or a tissue.

We take extra care to ensure that the doors we provide are not only good-looking, but fit properly as well. Since fiberglass doors don't shrink or expand like wood, there's little chance of your door ever getting jammed. The tensile stress on hinges is significantly reduced since fiberglass doors are considerably more lightweight than steel doors and wooden doors. In addition, Fibreglass doors have fully insulated cores that give your rooms better protection against cold and heat.

# PREMIUM DOORS (ENTRANCE DOOR)

From sunlight, wind, rain, storm, to snow, extreme temperatures, high humidity, and constant knocking and occasional scratching, there's a lot that outside or external doors in a building have to endure. All this extreme physical tension can make your door weaker which in turn leaves your building vulnerable to all kinds of dangers and attacks. Therefore, being alert and careful is crucial when you are finding the right external door. In addition to security, the front door plays a vital role in the aesthetics of your home as well and will greatly influence everyone's first impression of your home. A good quality external or front door is a prudent long-term investment that will pay you back in more ways than one.

# SLIDING FOLDING DOOR

A Folding Door opens by folding back in sections or panels. They are known as 'bi-fold doors', though most Folding Doors have more than two panels. They can be used as internal or external room dividers and we are making from weather proof WPC Material. Compared to a traditional door, a Folding Door has a greater aperture, so they increase physical and visual accessibility between an internal room and an outside space. Some examples include interior Folding Doors, for closets and pantries, folding patio doors, and larger folding wall systems for residential or commercial use..

# WPC DOOR FRAME

The importance of a high-quality door frame can't be overstated as they are the determining factor that ensures the life of your doors. The door frame ensures the door opens and closes smoothly and everyone using the door has a hassle-free and pleasant experience. The most significant benefit of using WPC material is that it's environmentally friendly. The manufacturing of WPC is an eco-friendly process. WPC material is made by recycled plastics and the waste produced by the wood industry. In addition, we offer WPC door frames in all sizes. WPC DOOR Frames provided by us are highly resistant to rot and decay, thus, long-lasting and a prudent investment. Moreover, WPC door frames are also cost-effective, waterproof, and fire-resistant.

- Fire-resistant
- Weather-proof
- Termite proof
- Different Sizes
- Low Maintenance
- Value For Money

# WPC WINDOW

WPC windows are both durable and useful to have 100% up opening for fresh air circulation in your home. Our high-quality and carefully built WPC windows will give you best returns on your investment. Our WPC Windows are also long-lasting, meaning you won't be needing a replacement for years after you install our WPC Windows. WPC is the ideal material for windows as it can very easily be molded into any shape, size, or design. Windows are crucial to the aesthetics of your house. At Tulsi, you get access to a broad collection of exciting and extremely pleasing designs. In addition to different shapes and designs, WPC Windows are also available in a variety of fun colors. WPC Windows are also fire resistant and thus provide impressive safety and protection.

Since most windows are external, WPC material ensures the durability of the window because outside-facing windows usually have to regularly deal with rainfall, snowfall, scorching heat, and winters. WPC is a mixture of wood and plastic and therefore it does not attract bugs and can be cleaned easily and conveniently. Our WPC Windows are supported by WPC frames,

- Fire-resistant
- Weather-proof
